ATHLETICS and CLUB SPORTS

Lots more than the
Three Rs
COMBINING ACADEMICS
and LIFE EXPERIENCE

LIFE, ACTUALLY
CAMPUS LIFE AND EVERY OPPORTUNITY
Amid human tragedy inevitably comes tales of human triumph — of body and of spirit. Studying with Dr. Harran, you’ll gain a keener understanding of the Holocaust under a best-selling author and world-renowned scholar who brings this tragedy to poignant life as a professor of history and religious studies at Chapman University. As founder and director of the Rodgers Center for Holocaust Education and former associate of the United States Holocaust Memorial Museum, Dr. Harran will take you and fellow Chapman students inside the Holocaust in a way few others can.
THERE ARE FEW JUNCTIONS IN LIFE WHERE YOU ARE FACED WITH A DECISION THAT WILL CHANGE THE TRAJECTORY OF YOUR FUTURE. College is one of those junctions. It’s where you’ll decide your career, build a network of friends and colleagues, and maybe even find the person you want to spend the rest of your life with. So when it comes time to choose a college, make sure it’s the right one for you.

From your first day at Chapman, you’ll discover things are different here.

- We’re one of the oldest schools on the West Coast (tracing our history back to 1861), yet our campus is one of the most modern around. More than a dozen buildings have been built or renovated in the last two decades — and more are on the horizon. Currently under construction is our Musco Center for the Arts, and newly finished and opening are our Harry and Diane Rinker Health Science Campus and Digital Media Arts Center. Others projects on the drawing board include our Center for Science and Technology and Tennis Recreation Center.

- We generate a remarkable number of student scholars, including Truman and Fulbright scholars, as well as winners of the Critical Language Scholarship and other national awards.

On the following pages, you’ll read about many of the qualities that sets Chapman apart from other institutions. Things like its stellar Orange County location (between Los Angeles and San Diego). Its reputation for academic excellence and entrepreneurial collaboration. Its emphasis on getting students engaged and involved the first day they set foot on campus. And the career-entrée possibilities that are part of this academic jewel.

A campus visit is still the best way to get a true sense of Chapman University. Tours and information sessions are available most weekdays; please make your reservation at chapman.edu/about/visit-chapman. If you’re ready to make the commitment, you can complete the Common App along with the Chapman University Questions on the Common App website — www.commonapp.org/Login. Additional application requirements are listed at chapman.edu/apply-now.

Many people say that selecting a college will be one of the most difficult decisions an individual will ever have to make. Chapman students say it’s not a tough call at all. COME SEE WHY.

Sincerely,

Marcela Mejia-Martinez

ON LOCATION
WHEN YOU THINK OF ORANGE COUNTY, CALIF. (KNOWN THE WORLD-OVER AS “THE OC”), YOU MIGHT THINK OF OUR 42 MILES OF FAMOUS BEACHES, OCEANFRONT RESORTS, AND TRENDY BEACH TOWNS, LIKE NEWPORT BEACH AND LAGUNA BEACH.

Or maybe our amusement parks, like Disneyland and Knott’s Berry Farm, leap to mind. Perhaps you’re thinking of the swallows and unique mission history of San Juan Capistrano. Or the sports fan in you is conjuring up the sounds of cracking bats and hot dog vendors at an Angels baseball game or the sound of blades on ice at an Anaheim Ducks hockey game.

ORANGE COUNTY HAS ALL THAT AND MORE.

Nestled between San Diego and Los Angeles, Orange County is close enough to both to benefit from their proximity, but separate enough to have developed its own creative energy and sense of casual sophistication. When you’re tired of the dynamic pulse of our towns and cities, rest assured that our wilderness and nature parks, coastal preserves, mountains, ski resorts, and miles of trails will help you reconnect with nature.

All of these make Orange County a spectacular place to call home, especially when you add in our amazing weather. That’s probably why so many businesses, arts organizations, research centers, service organizations, technology developers, entertainment professionals, healthcare providers,
and others have established themselves here.

Don't be surprised to find yourself rubbing elbows with the best of the best in entertainment, the arts, culture, and creative technology, with Hollywood just up the way and world-famous theme parks just around the corner (not to mention the Tony Award-winning South Coast Repertory and the Anaheim Ballet right here). Many of those best of the best in all of those companies are Chapman alumni, both in front of and behind the scenes.

Don't let our bright lights dazzle you too much — we're also home to one of California's most thriving biomedical, scientific, and life sciences hotspots, with innovative research, development, and production employing tens of thousands of top-caliber scientific talent. (Again, many of them Chapman alumni.) Our healthcare facilities are top-notch, and our county attracts investment and talent from all over the world for a stunning variety of businesses and corporations, large and small, leading to a creatively diverse environment and an innovation-rich culture.

That same culture makes the OC a stronghold for civic engagement, too. You'll find that people in our county are concerned about our cities, our county, our state, the nation, and beyond. We have a surprisingly strong sense of community and deep interest in education, cultural growth, social issues, and service and outreach programs.

With Chapman University situated right in the heart of Orange County, our students and faculty are a vital component of what makes this area so forward-thinking. Our educational programs tap directly into the vibrant energy of the area by bringing in top professionals in every field as guest speakers, educators, mentors, sponsors, or partners, and our graduates often find fulfilling careers right here in the OC, continuing the cycle and strengthening this flourishing part of Southern California even more.

THE OC. FROM DAY ONE, IT'S WHERE YOU BELONG.
The effort to restore and protect California’s critical native plant life takes place in the real world — on the coast, in the mountains, and along streams. Studying alongside Dr. Funk at Chapman University, you’ll be on the environmental frontlines with one of the foremost experts in the field. As the recipient of multiple research grants, Dr. Funk offers you and your fellow Chapman students the unique opportunity to conduct innovative boots-on-the-ground projects that target invasive species and regenerate California’s diverse ecosystems.
That’s why resident life at Chapman is so exceptional. Trust us, this is not the dorm experience your parents suffered through. Starting day one, you’re more than just a student — you’re part of a community of first-years who share your interests and goals. This year’s theme for first-year students is Fenestra (Latin for window), and you can expect that theme to be reflected all year in programs and experiences designed to jumpstart your connections and friendships with fellow students.

During Orientation week, you’ll be grouped with other students with the same academic interests. If you choose to live on campus (and 90 percent of Chapman first-years do), you’ll even be assigned to first-year-only residence halls.

**SLEEP** OK, sleeping isn’t all you’re going to do in your new living space. Not by a long shot. But the fact that every room in Chapman’s residence halls has extra-long twin beds is important when envisioning the decor of your new room. And those beds can be moved or...
bunked, so the combinations for your own room layout are up to you and your roommates.

Most rooms are shared by three people, and each of you will have your own desk, chair, dresser (most of which are moveable, too), and closet. Even better — about half of first-year rooms have their own bathroom. The other half share one between two adjoining rooms, so no more than six people will ever share a bathroom.

Wireless? Of course! All residence halls have wireless Internet access throughout. Plus, each room has Ethernet connections, phone jacks, and basic cable TV. (You can purchase premium channels separately.)

You’ll also find laundry rooms, trash and recycling facilities, and study and TV lounges in every residence hall. The best college app ever? The LaundryView real-time app shows how many washers and dryers are available in the laundry room you want to use, and the time remaining on each machine. No more lugging baskets around, only to find out the machines are all in use!
Starving? What are you in the mood for? Mexican? Chinese? American? Or how about wood-oven pizza, sushi, wings, something from an open-fire mesquite grill, a salad bar, fresh-baked muffins, smoothies, vegetarian or vegan fare? You name it, you can probably find it on campus.

If you’re a resident student, a meal plan is included in your tuition, and you can choose from plans that balance meals at the Randall Dining Commons in Sandhu Hall (think Vegas-worthy buffet, only with better food) with Panther Bucks good at all retail dining options on campus (like Einstein Bros. Bagels, Wow Café & Wingery, and Jamba Juice). If you’ve got late-night cravings, look no further than Doy’s Place, a convenience store in the bottom of Henley Hall that’s open from 8 p.m. to 1 a.m. Saved!

Your floor is designed with you in mind. If you’re in the College of Performing Arts, you’re probably going to need some practice rooms, right? And how cool would it be if they had digital keyboards in them? Done. Need space to hash out ideas with your accounting or Chinese language study group? You got it. A TV lounge with a DVD player where you can watch dailies of your latest film project with your film classmates? No problem.

Every residence hall is equipped with a variety of practice, study, and lounge rooms where you can hone your skills, polish your project, or cram for tomorrow’s exam (and catch up on your favorite TV shows while you’re at it).

All work, no play … you know the rest. Life in Chapman’s residence halls is never dull, and you can always find something to do to regenerate your soul, your body, and your sense of fun.

Each hall’s RAs (residence advisors) are trained to create opportunities during the week and on weekends for you to socialize and get better acquainted with your floor-mates. They’re also there to promote resources that will support you through any transitional challenges you may face.

But don’t wait for your RA — plan your own fun! Head for the Masson Family Beach Club, where you’ll find plenty of new friends hanging out in the pool or chillin’ by the fire pit. Or join a pick-up game on the basketball or sand volleyball courts. (There’s always a game about to start.)

Head over to Sandhu Hall’s 51-foot Doti-Struppa Rock Wall, and do a little climbing or bouldering to get your adrenaline flowing.

If adrenaline is the last thing you need, you’ll find space to relax in the beautiful outdoor courtyards and quads around the halls — round up a few friends and make good use of...
the grills and picnic tables, too. In the basement of Henley Hall you’ll find the central hangout for Chapman residents: Cheverton Commons. Don’t be surprised if you’re pulled into a game of billiards, foosball, or ping pong, or lured into the media room to watch a movie or two. And while you satisfy those munchies with something from Doy’s Place, you can listen in on the progressive sounds coming from the Chapman Radio studio.

PLANNING TO LIVE ON CAMPUS?
Great choice! Here’s where you and others who share your interests will be sharing, growing, bonding, relaxing, studying, sleeping, practicing, blowing off steam, laughing, planning … living! Go online (chapman.edu/students/services/housing-and-residence) to check out floor-plans and other details.

Photo courtesy of Scott Stedman, Class of 2014.
ETC. On the practical side, Chapman residents have plenty of permit-only parking, with underground parking available at Sandhu and Pralle-Sodaro Halls, the Miller parking structure, and outdoor parking areas by Davis and Morlan Halls. We’ve got security covered, too. Access to the residence halls is by keycard, and access to many individual rooms is by keycard and password. Cameras are located throughout the outside areas, including the front doors of every residence hall, and the parking areas all have emergency phones. In addition, resident advisors and public safety personnel do routine security checks throughout the day.

SECOND YEAR AND BEYOND While your first year as a Chapman resident is exciting, you’re just getting started. Sophomores and upperclassmen have additional housing options, such as double or single rooms, suites, or apartments with kitchens. They also have the option of living in Living Learning Communities in Sandhu Hall based on their interests, whether it’s film and media arts, business and entrepreneurship, the arts, outdoor and environmental issues, or a global mindset. For sophomores and above who want an off-campus living experience but who still relish the intellectual and social energy of Chapman peers, Panther Village is the perfect solution. Just 2.5 miles from campus, Panther Village offers apartment living in fully-furnished studio and loft apartments (complete with fireplaces) in a student-only community. All utilities, basic cable, and Internet are included, and the complex provides a shuttle to and from campus, a pool and spa, fitness room, basketball recreational area, community lounge and study space, and on-site laundry facilities.

LIVE! From day one, your college experience should be about more than just homework. This is your life, your goals, your world. Where you live, who you share your experiences with, and the chance to grow and enjoy yourself. That’s why your goals are important to us, too. And why we think you’ll find your Fenestra — your window of opportunities — at the Chapman residence halls.
It's the foundation of every play, the base your body works from as you hit the ball, take the shot or make the move. Lose your balance and the result is not pretty. Balance also happens to be the fundamental concept of NCAA Division III athletics, and Chapman University embraces that concept. Think of it this way: It's all about the hyphen. Take a good look at the term “student-athlete.” Two parts of one person, with the hyphen balancing the entire equation.
Right now, Chapman offers 25 different athletic options — 19 intercollegiate and six club sports — and even more are on the horizon. That presents an opportunity for just about anyone, whether you’re recruited or a walk-on, to have a college sports experience. In Division III, playing sports is not viewed as a career path; it’s a way to enhance your college experience. There are no athletic scholarships in Division III — you’re playing for the love of the game, not the anticipation of money. It’s all about feeling part of a team, refining your skills with talented coaches, competing to test yourself when it matters — all of the things that make sports so great are available at Chapman. And as the newest member of the Southern California Intercollegiate Athletic Conference, (SCIAC), Chapman teams and squads are competing against some of the best schools in our region.

Of course, achieving the student-athlete balance doesn’t mean a Panther athlete is any less passionate, dedicated, or fired up. Yes, a science lab or English assignment is given just as much importance as a practice — but when it’s game time, the nature of competition is the same at all levels. Ask any player or coach, or watch any game: Chapman plays to win — just visit YouTube and search for any Chapman sport.

And as a Panther, you’ll have the resources to achieve excellence. Chapman has committed more than $20 million in recent years to its athletics facilities. There’s the professional-quality sports field. The 2,800-seat stadium. A sparkling aquatics center with an Olympic-sized pool. And a state-of-the-art athletics pavilion. The award-winning Lastinger Athletics Complex is home to classrooms, locker rooms, our top-of-the-line athletic training room, and coaching and administrative offices.

The results reflect their commitment. Six Chapman teams have brought home national championships. Just in the last 12 years, the baseball program has been to the NCAA championship finals nine times, winning one national title and earning 17 All-America awards. In 2010, a Panther won the ITA Small Colleges singles championship in women’s tennis. Our men’s club lacrosse team has played in the national championship game twice in the last seven years. Since moving to Division III in 1995, the softball program has been to the NCAA finals seven times, with five top-three finishes, a national title and 23 All-America honors. In 2013-14 alone, Panthers

It’s all about feeling part of a team, refining your skills with talented coaches, competing to test yourself when it matters ... all the things that make sports so great are available at Chapman.
were named to All-America teams in baseball, men’s water polo and women’s water polo, women’s tennis, and volleyball. But equally impressive is the fact that since Chapman moved to Division III, we’ve had dozens of Academic All-District athletes — as well as dozens of All-America athletes. That sums up Panther athletics and the way Chapman embodies the student-athlete concept: **IT’S ABOUT BALANCE.**
A BREAKOUT SUCCESS

“I just tried to stay cool and get myself on and off that stage without saying something crazy.” That’s how Justin Simien ’05 describes the life-changing moment of winning the Special Jury Prize for Breakthrough Talent at the Sundance Film Festival.

Soon after Sundance, Lionsgate and Roadside Attractions acquired the rights to “Dear White People,” the film Simien wrote and directed, with plans for wide release in October. The buzz has been building ever since.

“Justin Simien is a funny, fresh, and current voice with his finger on the millennials’ pulse,” says Roadside co-president Howard Cohen.

Earlier this year, Variety named the Texas-born Simien one of its 10 Directors to Watch and praised “Dear White People” as a thought-provoking satire on race relations.

The excitement generated by a hilarious trailer that went viral helped show that there was an audience for the film, says Simien, who earned a BFA in film production at Chapman’s Dodge College of Film and Media Arts.

“I had to prove that this was a conversation worth having,” Simien says.

THE VOICE OF SUCCESS

Efrain Solis ’11 loves to test himself. And these days, he’s taking on a number of challenges with the full depth of his rich baritone voice.

Recently he was named Western Region champion in a prestigious Metropolitan Opera competition, earning a berth in the national semifinals at the Met in New York.

Professor Peter Atherton, pictured with Solis above, guided Solís during his undergraduate days as a vocal performance major at Chapman’s Hall-Musco Conservatory of Music and continues to mentor him as he transitions to the life of a professional.

After Solis graduated from Chapman, Atherton encouraged him to reach beyond his comfort zone and audition for the title role in Eugene Onegin with Russian Opera Workshop in Philadelphia. Solís landed the role, jump-starting his career. He also has played Guglielmo in Mozart’s Così fan tutte, and Figaro in Mozart’s Le Nozze di Figaro with Operafestival di Roma in Italy.

“I love a good challenge,” he said.

BRIDGING POLITICAL DIVIDES

As a policy insider working in Washington, D.C., Katie Vlietstra Wonnenberg ’03 knows all about the divisions that can poison political waters. It’s just that she chooses to drink from the cup of optimism.

“I feel like I’m a glass-is-half-full kind of girl,” she says.

After stints on John McCain’s presidential campaign and in the Texas governor’s office, she’s now vice president of government relations and public affairs at the National Association for the Self-Employed. She’s also immediate past president of Women Under Forty, which seeks to recruit good young women candidates and then help them succeed.

Push past the rancor and you really can get things done in Washington, Wonnenberg notes. “It’s all about building relationships.”

Where better to take on the challenge of bridging divides?

“In my 11 years of living here, I’ve seen a massive mistrust of government,” she says.

“And I want to change that.”
AN ENDEAVOUR OF HER OWN

Rebecca Hall ’96 is the kind of public relations professional who moves heaven and earth to serve her clients. So who better to promote the story of how engineering and construction firms helped transport an 85-ton space shuttle through the streets of Los Angeles?

As the shuttle Endeavour made its October 2012 trip from LAX to its final home at the California Science Center, Hall and her colleagues matched its journey step for step. In their hard hats and fluorescent vests, they helped the media understand the role played by Plump Engineering and Encon Construction.

Stories on the logistical effort appeared on nine TV outlets, including national newscasts on CBS, CNN and Fox, as well as the cover of the L.A. Times. The project is among the most rewarding of Hall’s career.

Hall, a past president of the Chapman Alumni Association Board whose firm, Idea Hall, is among the largest and most respected in Orange County, recalls, “it was just a beautiful moment of shared pride in this national treasure.”

NUMBERS WORTH CRUNCHING

In a business that’s all about the numbers, Chapman University accounting alumnus Michael Koll ’11 has landed a big one — a near-perfect score on the Uniform CPA Examination. The achievement won him the highly selective 2011 Elijah Watt Sells Award.

Out of 90,000 candidates who sat for the CPA exam in 2011, only 37 met the criteria for the award.

“Given the scope and caliber of the competition, this is truly a rare and remarkable achievement. Michael epitomizes the qualities of so many of our students,” says Glenn Pfeiffer, vice chancellor for academic administration at Chapman.

Koll was the only recipient from a university in California. He is currently an associate with PricewaterhouseCoopers in Irvine.

So how does it feel to earn such a selective award?

“Kind of surreal,” Koll said. “I didn’t go into the exam trying to get it. I just wanted to pass the first time through.”

TRAINING DAYS

From working with elite athletes in Australia and Germany to helping prepare top artists of Cirque du Soleil and the Radio City Rockettes, Alyssa Alpert ’10 seized every opportunity available in Chapman’s athletic training program. And in her professional career, she’s still finding ways to stand out.

As head athletic trainer for the New York Cosmos soccer team, she’s one of only a handful of women filling such a role in a professional men’s league.

“Man or woman, my skillset is the same,” she says. Skills and confidence have helped her gain the trust of players as she toils in her dream job at age 26. “I credit all I know to Chapman,” she adds.

A key lesson was that there’s always more to learn. For instance, when she interned with Cirque she confronted this dilemma:

“How do you stretch a contortionist?”

She’s still working on that one.
You’ve had a typically rigorous day at Chapman — discussing set design with an Academy Award-nominated art director, exploring experimental economics with a Nobel laureate, studying climate change with a world-renowned earth systems scientist, or examining the literature of resistance with a well-known author — and perhaps now you’re ready to unwind.

Whether it’s on-campus or off, your type of fun is just waiting to be discovered. Something’s always happening on campus: first-run film screenings, visits from guest lecturers or entertainers, free concerts in the Attallah Piazza, Homecoming festivities, the ever-popular Midnight Breakfast during finals week, the Spring Sizzle celebration, or Winterfest (complete with snow). And those barely scratch the surface of everything you can do. Looking for students who share your passion? Check out the huge list of on-campus clubs on page 36. If you don’t see one that speaks to you, start your own!

Chapman University is right-sized, friendly, comfortable, and close to everything. Pacific beaches await you just 15 minutes away, and the nearby mountains lure skiers and snowboarders. Surf in the morning, ski that afternoon — can it get any better?

Yeah, it can.

Disneyland is only 12 minutes away, and many students buy season passes, so they have a fun place to meet, eat, or chill. And if you’re in the mood to just hang out, there are plenty things to check out in Old Towne Orange, which is full of boutiques, neighborhood restaurants, and specialty shops (including a Food Network award-winning cupcake bakery).

If you love it, we’ve got it. So what type of Chapman student are you?
It’s been a year exactly since I committed to Chapman and I can honestly say I’ve never made a better decision. 
@ChapmanU 
@ChapmanAdmit
ARTISTE
Art feeds the soul. Treat yourself to the latest exhibition at the Guggenheim Gallery on campus, catch a presentation in the Department or Art's Visual Arts Thinkers Series, featuring distinguished artists, graphic designers, and art historians, or just wander around campus and enjoy The Escalette Permanent Collection, featuring modern and contemporary artworks from recognized and emerging artists.

You may also take in a dance recital with your friends and then grab bagels at Einstein Bros. located at the Student Union. Perhaps you’d rather see what the Art History Club has slated for their next meeting or hang out with kindred spirits in the Arts Initiative Living Learning Community (LLC). If you need to get off campus, visit one of the many galleries located in Old Towne Orange or take your sketchpad to Downtown Disney for a day of drawing and epic people watching. For something different, indulge your senses at one of Orange County's many arts and music festivals — including the University’s own International Arts Festival held every February.

FILM BUFF
This close to Hollywood, it’s hard not to love movies. On Chapman’s campus, it’s an easy addiction to indulge. Maybe you’ll take in an on-campus screening of a film by an international luminary (or a fellow student), or hit the campus Ticket Office for discount tickets to local AMC, Cinemark/Century, and Regal cinemas. See if the Film & Media Arts Living Learning Community in Sandhu Hall has a workshop or guest speaker on tap or volunteer to help with one of the campus film festivals happening throughout the year. Shoot some footage of your own — maybe at Newport Beach while the men’s crew team is practicing? Afterwards you can meet friends from one of Chapman’s film clubs at your favorite burger joint and finish the evening critiquing the latest blockbuster.

SCIENCE TECHIE
After a hard day in the lab or lecture hall, maybe what you need is a little hands-on experimentation. So grab a friend or two and head to the beach — strictly for ecological research purposes, of course! Then take in a meeting of one of Chapman’s science-themed clubs, check out a lecture by a well-known expert in the Science Forum Series, or test out your latest theories on aerodynamics with an intramural game of Ultimate Frisbee. Call it a night after you and some pals from the Sci-Fi TV Club catch a show or two on one of the TVs that are everywhere in the Student Union in Argyros Forum.

SPORTS FAN
Human bodies were only meant to sit still for so long. You’ll run out of energy long before you run out of activities at Chapman. Enjoy open hours at the Julia Argyros Fitness Center or swim a few laps at the Zee Allred Aquatics Center. Join an intramural sport like soccer, basketball, or volleyball, or try a club sport like men’s lacrosse, crew, cheerleading, or swimming. When you’re ready to watch someone else sweat for a while, take in one of the 19 Panther intercollegiate NCAA Division III sports, such as baseball, football, water polo, tennis, or track and field. With being a member of SCIAC, our student-athletes and fans can share the excitement of heated rivalries with other SCIAC members. Or pick up some discount tickets at the campus Ticket Office for a Ducks NHL game or an Angels MLB game. Still got energy to burn? Refuel at Jamba Juice in the Student Union, then head for the four-story Doti-Struppa Rock Wall to look at your day from a whole new perspective.
MUSIC LOVER

Music in your soul? Earphones a permanent part of your anatomy? You'll love the environment in and around campus. After class, spend some time practicing in a musical instrument practice room at Henley Hall, complete with digital keyboards. Find similar spirits in one of the music-themed campus clubs. Don't play? Don't worry. You're never far from a concert, starting with Fall Fest, Chapman's free outdoor music festival, featuring local indie and alternative acts. Maybe you'll catch an impromptu jam session in the Piazza or a leading-edge band at the Student Union. Chapman's Hall-Musco Conservatory of Music has a ridiculously full calendar of events from faculty recitals to choir performances, from orchestra concerts to percussion ensembles, and even a Picnic and Pops Concert under the stars. ChapmanRadio.com is always streaming something fresh, and their dance parties are not to be missed. (You might even land your own show on ChapmanRadio!)

GAMER

You know who you are. Hyper-fast reflexes. Extreme multi-tasking capabilities. (You figured out how to level up while listening to that Econ lecture this morning, right?) Meet up with your buds at the Student Union for an energy-burning game on an Xbox Kinect or Wii, and satisfy those over-powering snack cravings at the WOW Café & Wingery. Later, see what the Anime Escape club is up to. Or head for the Cheverton Commons community center in Henley Hall for some TV or video games, and maybe shoot some pool or crush your pals in a fierce game of ping pong.

BIBLIOMANIAC

“The act of writing is the act of discovering what you believe,” wrote David Hare. If words — your own or others' — are a pathway to discovery for you, get ready for the journey of your life! Feed your creative spirit by attending a poetry reading or dramatic performance on campus. Or lose yourself in the Leatherby Libraries for a while. Can you feel your own words burning inside you? Then polish up that short story or poem and submit it to Calliope, Chapman's creative writing journal. If that's not your writing passion, try your hand at The Panther, Chapman's student newspaper; PROWL, our online magazine; or Tabula Poetica, Chapman's poetry project. Don't forget to catch one of the true literati of our time when they speak as part of the lecture series sponsored by the John Fowles Center for Creative Writing. Then find your happy ending at a coffee shop on The Circle in town where there's always someone with a story to tell. (Maybe it's you.)

GLOBAL WARRIOR

Whether you're a true warrior for social change or just a caring member of Earth's big family, you can make a difference at Chapman. It starts with the simplest steps — like recycling centers in the residence halls — but it doesn't stop there. Practice your language skills with the French or Chinese culture clubs, perhaps. Participate in a sustainability discussion with your dorm-mates in the Greenhouse/Outdoor Expedition Living Learning Community (LLC), or talk diversity with friends from the Global Village LLC. Celebrate great-tasting food at the Orange International Street Fair in September or the International Food Festival on campus. Learn about labor-rights issues from the Fair Wear club, then shop in Old Towne Orange for clothes made by companies you can get behind. Volunteer for one of the many service-oriented organizations on campus who benefit people in developing countries or disadvantaged communities — and travel to an international project site to help out. Feel like staying closer to home? Join friends in the Chapman Day of Service helping out the local community. And don't forget spring break — while other kids are squandering theirs on sunburns and embarrassing videos, you can participate in the Alternative Break Program, traveling to exciting areas and engaging in much-needed service projects.
FUTURE CEO
When you were 6, did you hire door-to-door sales people to augment sales at your neighborhood lemonade stand? Still got a head for business, a flair for leadership, a knack for numbers? Grab some pals from the Business & Entrepreneurship Living Learning Community in Sandhu Hall and do a little networking with business faculty and local professionals over coffee. Every student at Chapman is automatically a member of Associated Students, but take it a step farther and join the Student Government Association to advocate for students’ rights, needs, interests, and welfare, or help the University Programming Board plan fun campus events. Head up a meeting of the College Democrats or College Republicans or any of the industry-oriented or leadership clubs. Better yet, check out the Leadership and Service programs offered through Student Civic Engagement to enrich your experience, make new friends, do some good in the community … and, of course, boost your resumé.

R U GREEK 2?
Fun. Leadership. Fun. Service. Fun. Experience. Oh yeah, and fun. Greek Life at Chapman is different than on other campuses. First off, sororities and fraternities don’t live in isolated houses, so you have the option to live in a Greek community in Glass Hall’s center wing. This blended Greek community fosters friendships and cooperation like nowhere else. Greek programs enhance your educational goals and let you stretch your leadership wings as you plan events, coordinate projects, manage public relations, or volunteer to work on service projects. Last year, Chapman’s Greek community donated more than 6,000 hours and $75,000 to philanthropic causes! With more than a third of Chapman students in the Greek system, you’ll never find yourself without something to do and someone to do it with, either!

YOUR LIFE, ACTUALLY
Whoever you are, whatever drives you, Chapman’s campus is home base for the experiences and opportunities that will help you shape your future and define yourself. So settle in and reach out — life is waiting for you.
Dr. David Frederick
Assistant Professor of Psychology
Crean College of Health and Behavioral Sciences, Chapman University

One of the Association for Psychological Science’s “Rising Stars” in 2013, Dr. Frederick brings to his Chapman University students an infectious passion for understanding the motivations behind human behavior. His research and writings invite you into the human mind through a unique social, health, and evolutionary lens that closely examines such real-life topics as body image, human sexuality, and the contemporary roles of men and women in relationships. Studying with Dr. Frederick at Chapman, you’ll participate in large-scale cross-cultural projects that involve participants generated by Match.com, NBCNews.com, and other sources to assess the biological factors in our behavior.
A world beyond

Le Monde.

世界.

HOWEVER YOU SAY IT... WE'RE THERE.

 однако. El Mundo

ملاوس.

The World.
WELCOME
TO CHAPMAN. NOW, GET OUT!

Sure, the setting at Chapman University is ideal, what with the swaying palms and the perma-sun and the iconic beaches just down the road. But there’s a whole world out there waiting for you. Go learn. Go teach. In return, you’ll gain perspective on life that you simply can’t find in a classroom (even in the renowned classrooms at Chapman). You are a global citizen — prove it. Not sure where to start? Stop by the Chapman Center for Global Education (CGE). Want to do an internship with the Cannes Film Festival in France? C’est magnifique! Looking to tap your inner Zen on an Ancient Wisdom tour of Tibet? Namaste. How about a study abroad program in New Zealand? (It’s not just for bungee jumpers anymore!) Whatever your interests, the Center for Global Education has a program for you.
STUDY ABROAD
If the word *study* conjures up bleary-eyed nights buried in a textbook, just add the word *abroad*. It’s like adding *musical* to *high school* — kind of changes the whole experience. You will have the opportunity to pursue your academic goals while absorbing the culture, politics, weather, food, and art of another country.

To apply for a study abroad or exchange program, you simply need to:

1) Be enrolled at Chapman.
2) Be a sophomore, junior or senior standing.
3) Have a minimum 3.0 GPA.

Oh, and having an open mind and adventurous spirit is also helpful. Programs are offered in more than 70 countries — from Australia to Vietnam — with lengths from a single semester to an entire academic year. You could even log 24,000 nautical miles on a Semester at Sea program … and still come home with college credits.

INTERNATIONAL INTERNSHIPS
Remember those “What I Did on My Vacation” essays back in the day? Well, going to grandma’s house won’t cut it anymore. An international internship gives you bragging rights — and nice creds on your resumé.

More than ever, it is a near certainty that you’ll someday work for — or launch/purchase/inherit — a company that has worldwide connections. Propel yourself into the global marketplace through the CGE’s internship programs. You’ll gain hands-on practical experience while developing a nuanced understanding of the culture in which you are working.

Chapman currently offers internships in Hong Kong, China; Dublin, Ireland; New Zealand; Australia; Shanghai, China; Madrid, Spain; Cannes, France; Santiago, Chile. You’ll earn credit toward your degree while spending up to ten weeks with some of the world’s preeminent corporations.

TRAVEL COURSES
What’s better than touring the Galapagos Islands, walking in Darwin’s very footsteps while you study his life and findings? How about touring the Galapagos, re-tracing Darwin, and getting credit for it? That’s what a CGE travel course is all about. It’s a mini study-abroad program — from one to six weeks — led by Chapman faculty from a variety of academic disciplines.

Such mini courses are offered during the summer or during Chapman’s unique interterm in January. Some recent programs included:

* Galapagos Island & Quito, Ecuador: Darwin and the Galapagos – 11 days
* Paris, France; Paris: Between Tradition and Modernity – 22 days
* Munich, Germany; German in January – 19 days
* London, UK; Deconstructing Hogwarts – 11 days
* London, UK; London Theatre Tour – 19 days
* Brazil; Business Across Cultures – 8 days
* Scandinavia; Business in Scandinavia – 10 days

View your international options at chapman.edu/cge

Are you still reading? By now you should be browsing the CGE website, taking passport photos, or figuring out how long it’ll take to get to the Galapagos. The world is waiting for you, and Chapman offers a variety of opportunities to explore it. So get out there already!
THERE ARE PLENTY OF PLACES TO GET A BASIC EDUCATION — if that’s all you really want. But maybe you want something more:

More hands-on learning
More interdisciplinary education
More control over your own educational path
More opportunities — as an undergrad! — to do original research with remarkable faculty
More global perspectives and travel opportunities
More internship prospects
More of everything!

IF SO, CHAPMAN UNIVERSITY IS THE RIGHT PLACE FOR YOU.

Known for our extraordinary blend of humanities, sciences, and professional programs, Chapman University offers a breadth of fields usually found only at larger institutions. Our stellar faculty, world-class collaborative programs, and intriguing General Education core program set us apart — and above.

Our mission is to provide you with a personalized education of distinction that will lead you into an inquiring, ethical, and productive life as a global citizen.

Late meetings with professors who really care remind why I love @ChapmanU so much. Do I really have to leave? #LastYearBestYear
HIGHLY MOTIVATED. ACADEMICALLY TALENTED. SOCIALLY RESPONSIBLE. FASCINATED BY BOTH CLASSIC AND EMERGING IDEAS.

If that’s you, the Chapman University Honors Program may be your perfect fit. In this broad interdisciplinary program based on great books and events from various world cultures, you’ll participate in small discussion-centered classes to experience collaboration and learning in ways that will surprise and excite you.

The dynamic Honors Program is influenced and enhanced by the very Honors students it serves. The program provides unparalleled intellectual, leadership, and social experiences, including retreats, opportunities to make presentations at national and regional conferences, dinners, and even camping trips.

Honors courses (which range from music to math, sociology to science, and communication to religious and philosophical studies) satisfy a portion of the GE requirements, and select courses often satisfy major, minor, and elective requirements, too.

If you crave an in-depth interdisciplinary approach and small discussion-centered classes, a supportive and active community of students and professors who challenge and encourage you, the Chapman Honors Program is where you belong.

CHAPMAN UNIVERSITY OFFERS A BREADTH OF FIELDS USUALLY FOUND ONLY AT LARGER INSTITUTIONS.

It starts with an exemplary General Education (GE) Program that provides a solid core of humanities, social sciences, sciences, and global citizenship. The GE program encourages you to explore interests outside your regular field of study to build a personalized and truly interdisciplinary foundation for the rest of your life.

The GE core enriches your field of study, whether it’s in the performing arts, sciences, educational studies, film and media, business, or any of Chapman’s 100+ areas of study. (See the full list on page 35.)
Experiential Learning — Hands On, Hearts In

Experiential learning is about combining ideas with hands-on experiences. The more you combine them, the richer the end results. Experiential learning moves you beyond the classroom to develop, apply, contribute, and share new knowledge. Even better — experiential learning engages you in mapping your own future.

At Chapman, experiential learning isn’t just a catchphrase. It’s what we do. To help make experiential learning part of your academic program, we offer four options:

- **STUDENT-FACULTY RESEARCH AND FACULTY-MENTORED RESEARCH** – Work with faculty in natural and social science labs, or develop your own faculty-mentored project in your major discipline.

- **DOMESTIC AND INTERNATIONAL INTERNSHIPS** – Make the workplace your classroom and bring your academic training to new organizational and cultural environments.

- **STUDY ABROAD AND TRAVEL COURSES** – Live and study around the world to gain new perspectives.

- **INDIVIDUALIZED EXPERIENTIAL LEARNING PROJECTS** – Design your own academic project to expand your knowledge.

We can help you chart your education path to maximize the opportunities you need to make that field of study uniquely yours. Our Academic Advising Program offers individual appointments, drop-in advising, and workshops to:

- Help you develop sound education goals
- Show how to effectively select courses and programs to achieve those goals
- Answer questions about academic policy, majors, transfer credit, etc.
- Be your lifeline when it comes to academic advising and counseling

Accredited by the Western Association of Schools and Colleges, Chapman University has been consistently rated as a top school in *U.S. News & World Report’s* Western-region comprehensive universities for the last decade.

IF YOU’RE READY TO learn more, do more, AND experience more, CHAPMAN’S READY FOR YOU.
Changing the world by changing education — that’s Dr. SooHoo’s passion and the mission for her students in Chapman University’s College of Educational Studies. As a student in Dr. SooHoo’s program, you’ll play an instrumental role in bringing reciprocal learning and civic engagement to cultures around the world, ranging from New Zealand and Cambodia to the Padres Unidos parent educator group in California. You’ll experience first hand the innovative local, regional, and international initiatives of Chapman’s Paolo Freire Democratic Project, which under Dr. SooHoo’s co-direction seeks to improve schools and communities while strengthening democratic practices in government.
SURE, YOU CAN LOOK AT PHOTOS, READ BLOGS, OR EVEN WATCH VIDEOS, BUT NOTHING BEATS A CAMPUS VISIT TO SEE HOW PERFECTLY YOU’LL FIT IN AT CHAPMAN UNIVERSITY. SO COME VISIT! WE’LL SHOW YOU ALL THE WAYS WE CAN HELP MAKE YOUR EDUCATION, YOUR UNIVERSITY EXPERIENCE, AND YOUR FUTURE EVERYTHING YOU’VE DREAMED.
Each fall, we host Discover Chapman Day to give you an in-depth look at the Chapman community. We spend the day presenting on our academic majors and programs through faculty, coaches, staff, and students alike. We show you (and your family) around campus — including the residence halls! You’ll get to try out the local lunch options and visit our Student Life Fair.

Can’t make it to Discover Chapman Day? No worries. We schedule regular guided campus tours throughout the year, and one of our admission fellows is often available for an interview with high school seniors. See chapman.edu/admission-visit or call the Office of Admission at (714) 997-6711 for more information.

READY TO APPLY?
For Fall 2014, Chapman University received more than 15,000 applications for just 1800 freshmen and transfer openings. Don’t let that scare you; it just means your Chapman peers will be among the best and brightest anywhere. While your grades and test scores are important, the admission committee will review all aspects of your application, including your essay recommendations, curriculum rigor, and your extracurricular activities. So if you think Chapman is the place for you, send in that application as soon as possible. We can’t wait to hear from you!

APPLYING FRESHMEN
Chapman University is a Common Application member school. So if you’re an incoming freshmen, here’s how to apply:

1. Create a Common Application account and select Chapman University as one of your colleges.
2. Submit your Common Application and Chapman University Questions.
3. If you are applying to a first choice major within the Departments of Art, Dance, or Theatre, the Hall-Musco Conservatory of Music, or Dodge Film and Media Arts, you will need to submit the Chapman University Art Supplement.
4. Ask your school counselor and teachers to submit all of their documents online through the Common Application website.
5. Go to chapman.edu/apply-now for an application checklist of everything else you’ll need to submit in order to complete your file.

APPLYING FOR TRANSFER ADMISSION
Chapman University welcomes students transferring from either 2-year or 4-year colleges or universities for both spring and fall semesters. If you’ve graduated from high school and have completed college-level credits after high school graduation, you’re considered a transfer applicant. Go to chapman.edu/transfer-requirements to learn all the requirements and suggestions for applying as a transfer student. Be sure you download the Transfer Brochure PDF for complete details.
**SCHOLARSHIPS AND FINANCIAL AID ARE WAITING FOR YOU**

**NEWS FLASH:** Approximately 84 percent of Chapman University students qualify for scholarships or earn other forms of financial aid. Chapman’s financial aid programs can assist students and families of all income levels, and every eligible student is encouraged to apply.

Start by completing and submitting the Free Application for Federal Student Aid (FAFSA) online at [fafsa.ed.gov](http://fafsa.ed.gov). (Chapman’s Title IV code is 001164). If you live in California, make sure your verified grade point average (GPA) has been submitted to the California Student Aid Commission to be considered for a Cal Grant, as well. Your FAFSA should be submitted by the March 2 priority deadline.

For more information about applying for financial aid, go to [chapman.edu/finaid](http://chapman.edu/finaid) and be sure to download the Student Financial Aid Information Guide PDF for detailed instructions and suggestions.

**MERIT AND TALENT SCHOLARSHIPS**

Chapman University values academic achievement and emerging talent in music, theatre, dance, art, film and television, creative writing, journalism, and science. We recognize this excellence by awarding scholarships based on a combination of grades, SAT or ACT scores, and completed curriculum, regardless of financial need. Applicants are automatically reviewed for merit award by applying through the Common Application. No additional application is necessary. Departmental scholarships may require submission of additional materials for talent scholarship consideration. Visit the respective department website for more information.

**THE COMMON APPLICATION**

**DEADLINES**

Deadlines for high school seniors or first-time college students applying for fall admission are probably coming more quickly than you think:

- **NOVEMBER 1** – Early Action Application Deadline
  Required deadline for Pharmacy (FEAP) 2+3 PharmD applicants.
  Film Production recommended deadline. Priority is given to first year applicants who apply by November 1.

- **JANUARY 15** – Regular Decision Deadline

  Deadlines for transfer students:

  - **OCTOBER 15** – Deadline for Spring semester
  - **MARCH 15** – Deadline for Fall semester
As you chart your own path to your future, explore Chapman University’s multiple schools and colleges, which offer a dazzling array of degree programs.

**Argyros School of Business Economics**
In a fast-paced, ever-evolving global business climate, you need to be a forward thinker with a wide array of skills in order to succeed. Chapman’s Argyros School of Business and Economics — in the heart of one of the nation’s most dynamic business communities and guided by dynamic scholars with access to top executives — molds successful business leaders by blending sound economic reasoning, initiative, integrity, analytical skills and effective communication.

**College of Educational Studies**
Changing the world by changing education — As a student in Chapman’s College for Educational Studies, you’ll be groomed to become a leader in holistic education, challenging convention through innovative and stimulating civic outreach and initiatives around the globe. Whatever your passion for teaching — from school counseling and special education to community engagement and educational leadership — your path to changing the world one student at a time starts here.

**Dodge College of Film and Media Arts**
Oscar, Emmy, Clio — you name it, our faculty has it. As a student in Chapman’s Dodge College of Film and Media Arts, you’ll have camera in hand from the moment you step on campus and learn from an array of award winners in an intimate environment. We’ll help you find your storytelling voice while providing extraordinary access to everything Hollywood, ranging from internships and facilities to international travel and a connected alumni network.

**Crean College of Health and Behavioral Sciences**
Once a part of the Schmid College of Science and Technology, Crean now stands alone. It’s a timely distinction reflecting our culture’s increasing awareness of the need understand bio-psychosocial factors in health, disability, disease, and physical therapy. As a student in Crean, you’ll engage with world-class faculty in fascinating hands-on research ranging from modern physical therapy strategies to the psychological aspects of health sciences, all dedicated to preparing you for a stimulating career solving complex challenges unique to the 21st Century.

**Wilkinson College of Humanities and Social Sciences**
On a rapidly changing landscape, your journey to intellectual, ethical, and professional success starts with a well-rounded education that prepares you for today’s unique challenges and opportunities. Chapman’s vibrant Wilkinson College of Humanities and Social Sciences — our largest college — does just that. Choose from nine diverse departments that provide enriching real-life experiences through community service, travel, internships, and other stimulating programs led by internationally distinguished scholars. You’ll soon discover why “well-rounded” isn’t a hollow adjective at Chapman.

**College of Performing Arts**
Whether you want to be behind the scenes or on stage, Chapman’s College of Performing Arts is the place to be if you aspire to be in theatre, music, or dance. Our facilities are second to none and our partnerships unprecedented. Work with Cirque du Soleil on the technical side of theatre, design scenes or costumes for stage productions, or pursue your dream of acting, dancing, composing, or becoming a concert pianist in a vibrant setting that values creativity and free expression.

**Schmid College of Science & Technology**
In Chapman’s Schmid College of Science and Technology, you’ll work alongside some of the top minds in the world, conducting innovative research with real-world results. You’ll have a wide range of choices, from traditional physics, chemistry, and Earth sciences to an innovative program that applies computational science techniques to such environmental challenges as natural and man-made disasters, watershed concerns, and the looming threats posed by climate change.

**School of Pharmacy**
Chapman’s newly accredited School of Pharmacy is the first in Orange County. But as a Pharmacy student, your on-the-ground training toward transforming the role of pharmacists in the 21st Century will extend far beyond Old Towne Orange. Guided by internationally renowned faculty, Chapman’s highly personalized interdisciplinary program is already a global leader in the noble pursuit of compassionate, science-based health care.

**Fowler School of Law**
The ABA-accredited Chapman’s Fowler School of Law is a forum where diverse and highly accomplished faculty members provide students with a combination of personalized instruction and real-world clinical and courtroom experience. Look ahead to graduate school with Chapman in mind. In addition to the Fowler School offerings in law, each of Chapman’s eight other schools and colleges offer graduate programs — many of which are 5-year enrollment plans, allowing you to earn your master’s with just one additional year of study.

Loved seeing all the Chapman spirit on campus today! #cuhome12 #senioryear
For Dr. Brown, being a pharmacist is all about helping people. Under his tutelage in Chapman University’s new School of Pharmacy, you’ll be on the cutting edge of his innovative work to transform treatment for patients around the world. Dr. Brown has given nearly 40 presentations worldwide, and, as an internationally admired industry leader, he has served as a consultant in Hungary, South Africa, and The Philippines. His dedication to expanding the pharmacist’s role in U.S. and international healthcare systems ensures an undergrad experience in Chapman’s School of Pharmacy unlike any other!
