____ **Sole Source** - Single seller/supplier controls the supply of products or services in a defined market. These situations are usually the product of market conditions such as: technology leadership, patent protection, limited/exclusive franchise distributorship, mergers and acquisitions, etc.

____ **Single Source** - Supplier selection determined by objective business decisions such as: leveraged volume purchase contracts, standardization programs/systems, parts/services provided by "original equipment manufacturer", consistency of quality/batch control, "just in time" delivery requirements, etc.
