Getting started

The Nortel IP Phone 2002 brings voice and data to your desktop.

Introduction

This guide contains information about:

- telephone buttons and lights
- telephone display
- telephone setup
- how to make and answer calls
- how to use the navigation buttons
- how to program memory buttons
- how to offset the time on your telephone display

Figure 1 shows the IP Phone 2002.

IP Phone 2002 telephone display

There are three areas to the IP Phone 2002 telephone display:

- Button label area
- Information area
- Feature options area
Figure 3 shows an example of the display and describes each area.

**Button label area**

The button label area shows the label and status of the four programmable memory buttons. For more information about these buttons, refer to “Program memory buttons” on page 12.

**Information area**

The Information area shows:

- the date and time when the telephone is not in use, and changes to show features and call information when the telephone is in use.

**Feature options area**

When a feature is activated, or when you are on an active call, the display command line shows you the action you must take to proceed.

For example: **Pswd**. This means you must enter your mailbox password.

The Feature options area shows the label for the FEATURE button and for the three display buttons. These button labels appear in capital letters directly above the Feature and display buttons, and to the right of the FEATURE label on the display. These button labels vary depending on the feature in use.

**About your programmable buttons**

Your System Administrator assigns the four programmable buttons as line, intercom, or memory buttons. The label for each button appears on the display next to the button. For more information, see your System Administrator.
Telephone setup

This section describes the IP Phone 2002 display features:

- Display contrast
- Language choice
- Ring type

**Note:** For more information about the features available on your telephone and how to use them, refer to the *BCM Telephone Feature User Guide*.

**Display contrast level**

Adjust the contrast for the telephone display.

1. Press Feature *7.
2. Press **DOWN** and **UP** to view the levels.
3. Press **OK** to select a level.

**Language choice**

Select the Primary Language for the telephone display.

1. Press Feature *501.
   Select the Alternate Language for the telephone display.

   Select the Alternate Language 2 for the telephone display.

3. Press Feature *503.
   Select the Alternate Language 3 for the telephone display.

4. Press Feature *504.
   Select the Alternate Language 4 for the telephone display.

**Ring type**

Select a different ring type for your telephone.

2. Press 1, 2, 3, 4, or NEXT or to hear the different ring types.
3. Press OK to store the ring type.
Features and buttons

This chapter describes some of the IP Phone 2002 buttons and call features:

- Basic call features
- Navigation buttons
- Memory buttons

Note: For more information about the features available on your telephone and how to use them, refer to the *BCM Telephone Feature User Guide*.

Basic call features

You can make external and internal calls using the following features:

- make a call
- answer a call
- hold a call
- Handsfree
- headset
- Mute
- Time Offset

Make a call

There are many ways to make a call depending on your telephone programming and the type of call.

External calls using line buttons

1. Lift the handset.
2. Press a line button.
3. Dial the external telephone number.

External calls using intercom buttons

1. Lift the handset.
2. Press an intercom button, and enter a line pool access code.
3. When you hear an external dial tone, dial the external telephone number.

Note: Contact your System Administrator for a list of line pool codes. When entering a line pool access code on PRI lines, you do not hear dial tone.
Internal calls using intercom buttons

1. Lift the handset.
2. Press an intercom button.
3. Dial the extension number.

Note: Contact your System Administrator for a list of extension numbers.

Answer calls

When your telephone rings and the light flashes, or an intercom or line button indicator flashes:

- lift the handset.

OR

- press the line or intercom button with the flashing indicator before you lift the handset.

Hold

- Calls are put on hold automatically when you switch from one line to another.
- While on a call, press . The indicator for the line on hold flashes.
- To retrieve a held call, press the line button with the flashing indicator.

Handsfree

Your System Administrator must program the Handsfree feature to your telephone.

- Press to make or answer a call.
- To switch to Handsfree when you are on a handset call, press and replace the handset. Lift the handset to switch back.
- To switch to Handsfree when you are on a headset call, press . Press to switch back.

Headset

You must have a headset installed on your telephone to use this feature.

- Press to activate the headset mode. When the light is on, press a line or intercom button to make a call.
- To switch to your headset when you are on a handset call, press and replace the handset. Lift the handset to switch back.
- To switch to your headset when you are on a Handsfree call, press . Press to switch back.
Mute

- While on a call, press \( \frac{5}{9} \) to turn off the microphone. The \( \frac{5}{9} \) button lights when the microphone is off.
- Press \( \frac{9}{9} \) again to turn on the microphone.
- Use \( \frac{9}{9} \) on handset, Handsfree, or headset calls.

Time offset

When your IP Phone 2002 is located in a different time zone from your system, the display shows the system time, not the local time. The Time Offset feature enables you to adjust the time that appears on the display.

Before you begin, calculate the time difference, in hours, between the server time and local time. To change the time that appears on your telephone display to local time:

1. Press Feature *510.
2. Press CHANGE.
3. Press * to switch between adding or subtracting time.
4. Using the dialpad, enter the number of hours between local time and system time. **Note:** Press # to enter half hour increments.
5. Press OK. **Note:** It may take up to one minute for the change to appear on the display.

Navigation buttons

Use the Navigation buttons to scroll through or make changes to your call log.

1. Press Feature 812.

Call log

Call log displays use the following special characters:

1. (underline) identifies a new item
2. \( \text{\textasciitilde} \) identifies answered calls
3. \( \text{\$} \) identifies long distance calls
4. \( \text{/} \) identifies that the information has been shortened
To view your Call Log:

1  Press  to view old items.
   Press  to view new items.
   Press  to return to the last viewed item.
2  Press  and  to move through your items.
3  Press  and  to view more information on an item.

To erase a Call Log entry:

1  Press  while viewing an item.

To return a call from your Call Log:

1  Display the desired number on your telephone.
2  Edit the number, if required. You can add numbers for long-distance dialing or line pool access, or you can remove numbers using  and .
3  Press a line button.
4  Lift the handset.

Call log options:

1  Press Feature •°).

Select the type of calls that will automatically be stored in your Call Log. Press  to see the next setting. Press ÷ to select the displayed setting.

Memory buttons

This section contains information about the IP Phone 2002 memory buttons and how to use them. These are buttons not assigned as line or intercom buttons. Memory buttons store internal and external numbers or features to give you one-touch dialing or feature activation.

Program memory buttons

You can program a memory button with a new number or feature.

External autodial

1  Press Feature *1.
2  Press a memory button.
3  Dial the external number.
4 Press OK to store the number.

**Internal autodial**
1 Press Feature *2.
2 Press a memory button.
3 Dial the extension number.
4 Press OK to store the number.

**Features**
1 Press Feature *3.
2 Press a memory button.
3 Press Feature and enter the feature code.
4 Press OK to store the feature code.

**Erase memory buttons**
1 Press Feature *1.
2 Press a memory button.
3 Press OK to erase the button.
