With the wide array of social media tools and professional learning communities available, there is no reason for new teachers to feel alone, isolated, disconnected, or at a loss for knowing what to do in any situation. Every year, schools in the US hire more than 200,000 new teachers for that first day of class. As summer rolls around, at least 22,000 have quit. Even those who make it beyond the first year aren’t likely to stay long: about 30 percent of new teachers leave the profession after just three years, and more than 45 percent after five. What can we do to support new teacher retention? How can supporting them to connect help to bridge the gap? Through easy-to-implement strategies, this book will provide ways for new teachers to build confidence in harnessing the power of social media to connect to resources and those in the field who can stand in the gap to support them.
