PANEL 1

THE SOCIAL CONTRACT: TERMS, CONDITIONS & PRIVACY

We explore how modern technology has reshaped the implicit “social contract” between users and platforms. Panelists will examine how much privacy individuals surrender in exchange for access to online spaces through the lens of digital consent, evolving terms of service, and user data collection. Testing the legal and ethical boundaries of data use, this discussion will raise questions focusing on transparency, accountability and the limits of user autonomy in our hyperconnected world.

PANEL 2

PRIVACY IN FLUX: THE INTERNATIONAL DIGITAL DIVIDE

Exploring the contrasting approaches of the United States and the European Union to data privacy regulation, our panelists reflect on how differing legal philosophies, for example, market-driven innovation versus rights-based protection, shape the governance of personal information in each system. This discussion examines the implications of frameworks like the General Data Protection Regulation (GDPR) and other emergent U.S. laws, highlighting how these regulations attempt to strike a balance between privacy, accountability and technological growth in an increasingly global digital environment.
