- [13] Note that this measurement must last a period of time longer than $\frac{D}{c}$ in order not to violate causality; see also Tollaksen, J. *Proc. of SPIE*, Vol. 6573, 65730H, (2007).
- [14] Unitarity requires a reflected state $|\psi_3\rangle$. Unlike $|\psi_L\rangle$ and $|\psi_R\rangle$, moving in the $+y$ direction, $|\psi_3\rangle$ moves in the $-y$ direction. Since $\langle\psi_3|\psi_L\rangle = 0$, omitting it does not affect the argument.
