

Preparing a Competitive SURF Application Workshop Series

Attend a workshop designed to guide students through the new SURF application process.

Students are encouraged to bring a project idea and receive guidance on how to develop a strong, competitive application.

Workshop 1 - Creative Activity Projects - Thursday, February 12th, 5-6 PM, AF209A

This session supports proposals that involve scholarly inquiry through creative work and interdisciplinary exploration. Projects may include creative portfolios, artistic or performance projects, and other experimental or expressive work that demonstrates intellectual rigor and critical engagement with the topic.

Workshop 2 - Research-Focused Projects - Thursday, February 19th, 1-2 PM, BK 401

This session supports proposals in the social sciences, STEM fields (science, technology, engineering, and mathematics), applied disciplines, and the humanities. These projects are primarily scholarly and analytical rather than creative or artistic.
