

Venice and the Alps:

CLIMATE, WATER, AND SOCIETY OF NORTHERN ITALY

June 3-16, 2024

SCHOLARSHIP AND ACADEMIC CREDIT AVAILABLE

Explore the dynamic interaction between water management, engineering, human history, and climate change.

Engage in experiential tours and self-guided research to discover the intricacies of rivers, canals, lagoons, lakes, and glaciers and their vital role in human civilization.

Open to students from all majors; no prior background in environmental science is needed.

Taught by:

Dr. Thomas Piechota (Water Engineering)
piechota@chapman.edu

and Dr. Federico Pacchioni (Italian Studies)
pacchion@chapman.edu
