

# Interdisciplinary Minor in **DISABILITY STUDIES**

*Disability Studies goes hand-in-hand with civic engagement. It helps all to think about, apply, and improve our assumptions about how we live together.*

The minor focuses on issues in the representation, history, and interpretation of disability as a social category of human difference rather than issues related to the clinical diagnosis and treatment of impairments.

The Disability Studies Minor provides an overview of the interdisciplinary study of disability across the domains of human experience. It allows students to explore the variety of approaches to understanding disability in personal, social, economic, artistic, and political contexts.
